Skill Area Wise Performance

Areas you are good at

These are the top areas which we have identified as your strengths.

S.No	Your Strength Area	Description of your Strength
1	Critical Thinking & Problem Solving	You have the ability to think critically and analytically. You are a good problem solver and have the potential to do specifically well in the areas of science & technology
2	Leading Vision	You have a good understanding of the nuances required to engage and motivate people around you. Leadership skills are highly sought after by any employer as they involve dealing with people in such a way as to inspire, enthuse and build respect.

Areas of improvement

These are the top areas which we have identified as your improvement areas.

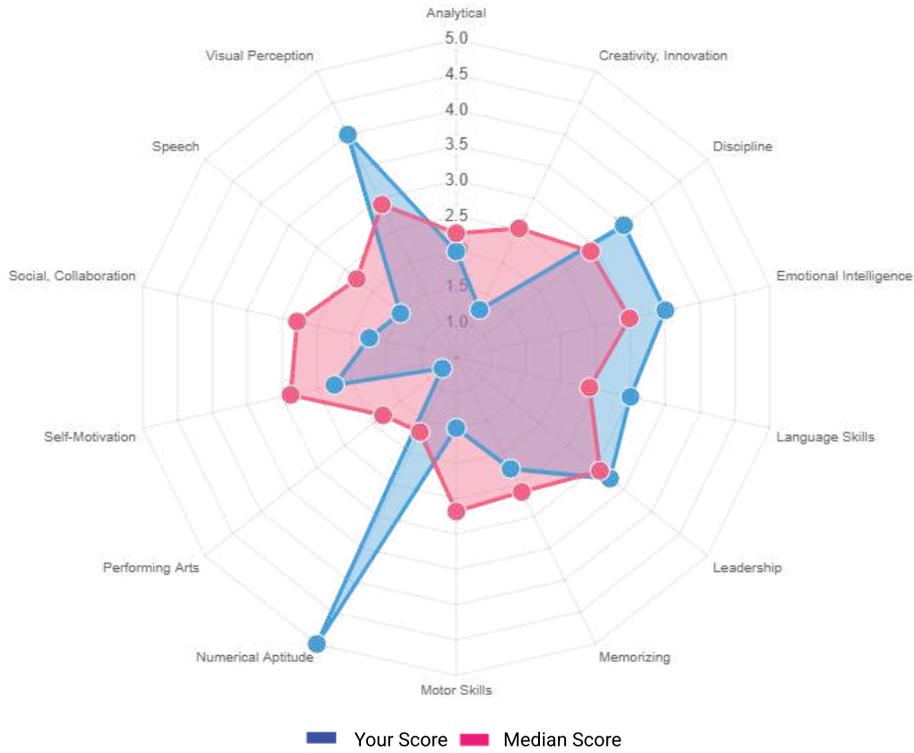

S.No	Areas need more focus	Description of Focus Areas
1	Well-rounded physical abilities	Your score shows that you have relatively a placid lifestyle and can spend more time in physical activities. Start with some simple physical activities like walking, taking stairs or gardening and do it regularly.
2	Creative Innovation	Contrary to popular belief, we can actually learn the art of thinking creatively and innovatively. To make it into a habit, schedule "15 minutes of creativity" into your daily routine and try some simple exercises to improve your creativity Here is one such exercise: Pick a song you like and sing it with new lyrics.
3	Collaboration	Effective collaboration not only requires clarity relating to roles and results, but also self-steering, transparency and accountability. By increasing your understanding about how a group of people work, you can improve your collaboration skills and achieve higher quality results for yourself and your team.

Section 3: Your skill profile definition

Your skill profile

This is a visual presentation of your skill profile compared to the median (or average) performance at the same level or age group. The blue dots depict your skill-wise score and the red dots present the median performance of the rest of the population at the same level. Do take a good note of your strong and weak areas based on your performance in the career mapping test.

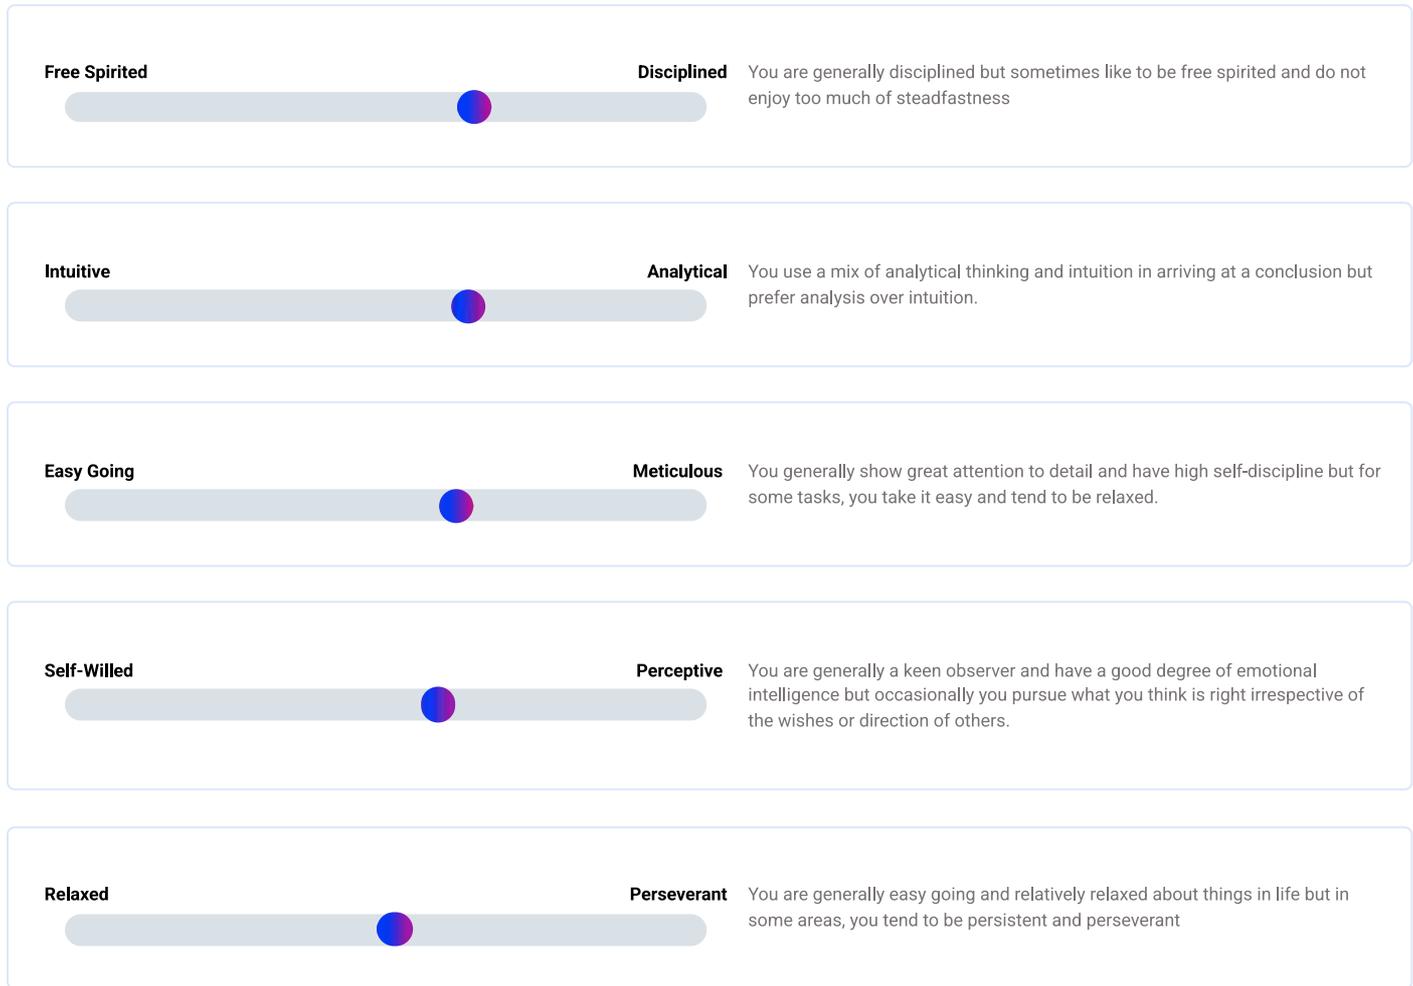

You are good in the following skills - Discipline, Visual Perception, Numerical Aptitude . There are a few areas where there are potential improvements observed. These areas are as follows - Performing Arts, Creativity, Innovation, Motor Skills.

Your Personality Dimensions

We have analyzed your profile across 10 unique personality dimensions. Here is the output of your personality analysis.

Your Personality Dimensions (continued...)

Realistic **Imaginative**

You are generally imaginative and have good imaginative power. You generally like imaginations but sometimes you are realistic or practical based on situation.

Conventional **Enterprising**

You tend to strike a balance between experimenting with new ideas and working in a set predefined way but prefer structure over experimentation

Reserved **Sociable**

You generally don't like being the center of attention or promoting yourself/standing out in a crowd

Soft **Athletic**

Your physical fitness and activity level are moderate

Consistent **Inventive**

You mostly are conventional in your approach and prefer to be accurate rather than experimenting

Creativity, Innovation	<p>The good news is that "Creativity and Innovation" can be mastered with the right interventions and sincere effort. Here is a simple tip to be more creative and innovative : Whenever you approach a problem, look for a variety of solutions. Don't just go with the first idea you have, take your time to think of other possible ways to approach the problem. This is a simple but effective way to build both your problem-solving and creative thinking skills.</p>	<div data-bbox="954 421 1230 748">  <p>Innovation - methods, tools, working pri...</p> <p>★★★★★ 4.7 Free</p> </div> <div data-bbox="954 768 1230 1095">  <p>How To Develop An Awesome Memory</p> <p>★★★★★ 4.6 Paid</p> </div>

Improvements Area	Recommendations around Improvement area	Courses recommended for you
<p>Motor Skills</p>	<p>We recommend that you spend some time in physical activities starting with mild to moderate activities. A healthy lifestyle is the key to sustainable success in any area of life. Improved concentration, confidence and self-worth are key psychological benefit of regular physical activity. Exercise, releases a chemical called endorphins in the body. Endorphins trigger a positive feeling in the body. The feeling that follows a strenuous yoga/run/workout is often described as "euphoric." That feeling, referred to as a "runner's high," goes together with a positive and energizing outlook on life. It will help you fight the stress of dedicating long hours to study and improve your concentration and memory. So, a must follow principle of doing well in your studies is to take out minimum 30 minutes and spend it for a game, sports, running or any other rigorous physical activity</p>	<div data-bbox="951 421 1227 748">  <p>30 minutes Full Body Warm Up for Fitness</p> <p>★★★★★ 4.1 Free</p> </div> <div data-bbox="951 766 1227 1093">  <p>Fitness, Flexibility and Mobility</p> <p>★★★★★ 4.5 Free</p> </div>
